

# INTERNALLY COUPLED INPUT PATH REDUNDANCY

Table 1. Demographic characteristics of the study population

| Characteristic | Number (n) | Percentage (%) |
|----------------|------------|----------------|
| Age (years)    |            |                |
| 18-24          | 10         | 10.0           |
| 25-34          | 15         | 15.0           |
| 35-44          | 20         | 20.0           |
| 45-54          | 25         | 25.0           |
| 55-64          | 30         | 30.0           |
| 65-74          | 35         | 35.0           |
| 75-84          | 40         | 40.0           |
| 85-94          | 45         | 45.0           |
| 95-104         | 50         | 50.0           |
| 105-114        | 55         | 55.0           |
| 115-124        | 60         | 60.0           |
| 125-134        | 65         | 65.0           |
| 135-144        | 70         | 70.0           |
| 145-154        | 75         | 75.0           |
| 155-164        | 80         | 80.0           |
| 165-174        | 85         | 85.0           |
| 175-184        | 90         | 90.0           |
| 185-194        | 95         | 95.0           |
| 195-204        | 100        | 100.0          |
| 205-214        | 105        | 105.0          |
| 215-224        | 110        | 110.0          |
| 225-234        | 115        | 115.0          |
| 235-244        | 120        | 120.0          |
| 245-254        | 125        | 125.0          |
| 255-264        | 130        | 130.0          |
| 265-274        | 135        | 135.0          |
| 275-284        | 140        | 140.0          |
| 285-294        | 145        | 145.0          |
| 295-304        | 150        | 150.0          |
| 305-314        | 155        | 155.0          |
| 315-324        | 160        | 160.0          |
